# FLEX DUO 34

## Key Features:

 Height: **8.5 cm**    No. of slats: **34**    No. of firmness regul.: **6**

 Multi-zone: **5 zones**    Shoulder zone: **YES**

 Headboard tilt: **YES**    Leg tilt: **NE**    Motor: **NO**

 **Center strip** for additional weight distribution

 **Dimensions:**  
80, 90, 100, 120, 140 x 190/200 cm  
\*Custom measures also available.

 **Weight Capacity:**  
max. 150 kg

  
**FIRMNESS  
ADJUSTMENT**

## CENTER STRIP

**Flex DUO 34** slatted bed base includes a center strip for weight distribution.

## 6 FIRMNESS REGULATORS

With **six firmness regulators**, you can adjust the firmness of the slatted bed base in the lumbar area. This gives you complete control over your sleeping experience.

## SHOULDER ZONE

The shoulder area has an additional firmness adjustment system for relieving pressure points.

## DURABILITY AND HYGIENE

A **special foil** covers the entire surface of the slatted bed base and ensures long-lasting use. It reduces the risk of dust mites and microbes while making the bed base easier to clean.

# FIX TRIO 42

42  
SLATS

**Weight Capacity:**  
max. 150 kg

## ADDITIONAL ADJUSTMENTS IN SHOULDER AREA

The shoulder area with **additional adjustments** provide comfortable relief for your shoulders.

## CENTER STRIP

The REST LUX 28 slatted base **includes a center strip** for weight distribution.

## REFLUX AND BREATHING

**Eliminate reflux issues** and relieve your spine. The slatted bed base allows elevation of the upper body, and creates a long incline, which is proven to greatly alleviate problems with reflux (heartburn).

The benefits of such sleeping and resting are significant. With our slatted bed base, your **breathing dynamics become natural and balanced**. By slightly elevating the upper body (approximately 15 cm), the respiratory tracts open up and allow easier breathing and better oxygen supply to the body. This way, the chest is much more open, allowing you to wake up full of energy and ready to tackle a new day.

# DUABLO MOTOR

## Key Features:

- Height: **8.5 cm**    No. of slats: **28**    No. of firmness regul.: **6**

max. 200 kg

## LIFTING MECHANISM

The slatted bed base is suitable for beds with a lifting mechanism or as a standalone bed base.

## LONG LIFESPAN

**28 flexible slats** are secured with flexible rubber caps, which ensure durability and a long lifespan of the slatted bed base.

## STRONG AND SOLID

A very strong solid bed base for wider bed widths, capable of supporting more weight.

## CENTER STRIP

The **DUO NATUR 28 slatted base** includes a **central strip** for weight distribution.

## ADDITIONAL EXPLANATION: DYNAMIC MOTOR

If you have a bed with a drawer – consider purchasing the **DYNAMIC MOTOR** (because the motor is flat and does not protrude below the bed's level).

This product can be placed on the floor, a sofa, or a particleboard and it is ready for use. There is no need for free light under the bed.

In the event of a power outage, manual adjustment of the head or legs is possible.

We can make custom measures up to 90 cm in width.

## ADDITIONAL EXPLANATION: DUABLO MOTOR

The power of the motor itself is 2x4500 N (technical specifications).

This is a classic dual motor that extends below the level of the slatted bed base. It cannot be used in beds with drawers or cross elements. The product requires free space under the bed.

The motor comes with a battery for emergency descent in the event of a power outage.

\*Custom measures cannot be made.

# WEIGHT CAPACITY

## IMPORTANT!

The slatted bed base must lie in its full length on the bed frame. All slatted bed bases are manufactured with a negative tolerance, typically ranging from 1 to 1.5 cm in width and 3 to 4 cm in length.

**This applies to all slatted bed bases.**

# DOCTOR'S RECOMMENDATION

**The characteristics of the mentioned mattress are excellent for practically all pulmonology patients.**

Patients with pneumonia, especially those with a more severe form, require easy elevation of the head for easier expectoration and respiratory physiotherapy. Patients with chronic obstructive pulmonary disease (COPD), particularly in the morning, require respiratory toileting for the same reason. For this reason, the characteristics of an adjustable bed are ideal for patients with COPD and other chronic lung diseases. The antimicrobial features of the bed are important for all lung patients and also preventive for older patients who may develop pneumonia. Latex, as a hypoallergenic material, is particularly important for asthmatics who are often allergic to dust mites and molds. Additional covers prevent the inhalation of dust mites. Lung patients often have problems with gastric acid, which further causes irritating cough. From this perspective, the option to adjust the head's height is very beneficial for lung patients.
